Haptic, auditory, and visual indicators alert when batteries need to be changed

Travel Case

Redesigned case allows for transport of light, charger, loupes, and up to four batteries

THE RONIN FOUNDATION

Let's make a difference together

Our mission is to provide light where light is needed. From South America to Africa to right here in the U.S., we are dedicated to helping doctors who give their time to help others. The Ronin Foundation provides lighting equipment for doctors to use while on their mission trips.

www.RoninFoundation.com

HOW IT WORKS

STEP 1 The traveling doctor requests a unit from Ronin Surgical for the specific dates of their mission trip.

STEP 2 The doctor receives the unit before departure and takes the unit with them in their personal belongings.

STEP 3 The doctor uses the product during their mission and brings the complete unit back with them.

STEP 4 Once home from their trip, the doctor ships the unit back to Ronin using the provided shipping label.
