

DTR Medical[®]

Cervical Rotating Biopsy Punch

The Design Checklist

- ✓ Latest generation top jaw now stronger than Titanium, and 4x the strength of previous jaw
- ✓ Allows a Biopsy to be taken from a Hardened Cervix
- ✓ Low profile jaw provides better access to the transformation zone when migrating into the Endocervical Canal
- ✓ 360° rotation enables enhanced positioning and patient interaction
- ✓ Ensures a sharp, clean cut reducing Cervical trauma and patient discomfort
- ✓ Ergonomic handle designed for comfort
- ✓ Provides value-based benefits, improving procedure quality, patient safety, and overall cost savings
- ✓ Lightweight compared to alternatives
- ✓ Ideal for busy Colposcopy Clinics, with high-quality samples taken first-time
- ✓ Useful for increased HPV testing demands
- ✓ Single-use eliminates cross-contamination, inadequate samples, and repeat procedures
- ✓ UK manufactured
- ✓ Sterile, individually packed

DTR Medical[®]

Cervical Rotating Biopsy Punch

Intended Use

The Cervical Rotating Biopsy Punch has been designed specifically for use in Gynecological procedures to obtain a Cervical Biopsy.

Equipped with a pair of cupped jaws at the end of a metal rod with a handle and trigger. The long metal construction ensures better access to the Cervix for the jaws, whilst the handle is operated outside. When the trigger is pulled the sharp jaw closes, this action removes a segment of Tissue for the Biopsy.

It is a Single-use device which is disposed of once used.

Instructions For Use (IFU)

Instructions for use available upon request.

Conformity to European Regulations

Conforms to Medical Directive 93/42/EEC.

Manufactured under EN ISO:13485 in an ISO 7 Cleanroom Environment.
